### DETAILED ACTION

1. This is the first Office Action on the merits of Application No. 09/765,762 filed on 01/18/2001. Claims 1-6 are currently pending.

#### *Election/Restrictions*

2. Applicant's election without traverse of Species 3, Figs. 7 and 8, in Paper No. 7 is acknowledged.
3. Claims 2, 3 and 6 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 7.

#### *Claim Rejections - 35 USC § 102*

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1, 4 and 5 are rejected under 35 U.S.C. 102(b) as being anticipated by Castelet (US 3,318,168).

Castelet'168 teaches a transmission comprising a main shaft (12) connected with a crankshaft (3) through a clutch (8) and having a plurality of first drive gears (34, 35), a counter shaft (16) having first driven gears (20, 21) and a second drive gear (36), a drive shaft (11) having a second driven gear (38), a front differential (4), a transmission case (i.e., the case that

Art Unit: 3681

accommodates the shafts 12, 16, 11, the clutch 8, and the differential 4), and a space (i.e., the space having the clutch 8) in a front part of the transmission case (1, 5). Regarding claim 4, said transmission case comprising a plurality of dividable members (i.e., bearings 13). Note that each of the bearings (13) has a cylindrical configuration longitudinally extending. Regarding claim 5, note that the countershaft (16) is offset in one widthwise direction with respect to said main shaft (12), and said drive shaft (11) is offset in the other widthwise direction with respect to said main shaft (12).

#### *Cited Prior Art*

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure: Webster et al.'244, Morino'587, Numazawa et al.'791, Numazawa et al.'869, and Bruce'399 which each shows a transmission comprising a case accommodating a plurality of transmission shafts and a differential.

#### *Communication*

7. Submission of your response by facsimile transmission is encouraged. Group 3600's facsimile number is (703) 305-3597. Recognizing the fact that reducing cycle time in the processing and examination of patent applications will effectively increase a patent's term, it is to your benefit to submit responses by facsimile transmission whenever permissible. Such submission will place the response directly in our examining group's hands and will eliminate Post Office processing and delivery time as well as the PTO's mail room processing and delivery time. For a complete list of correspondence not permitted by facsimile transmission, see M.P.E.P. 502.01. In general, most responses and/or amendments not requiring a fee, as well as those requiring a fee but charging such fee to a deposit account, can be submitted by facsimile transmission. Responses requiring a fee which applicant is paying by check should not be submitting by facsimile transmission separately from the check. Responses submitted by facsimile transmission should include a Certificate of Transmission (M.P.E.P. 512). The following is an example of the format the certification might take:

I hereby certify that this correspondence is being facsimile transmitted to  
the Patent and Trademark Office (Fax No. (703) 305-3597) on \_\_\_\_\_  
(Date)

Typed or printed name of person signing this certificate:

(Signature)

If your response is submitted by facsimile transmission, you are hereby reminded that the original should be retained as evidence of authenticity (37 CFR 1.4 and M.P.E.P. 502.02). Please do not separately mail the original or another copy unless required by the Patent and Trademark Office. Submission of the original response or a follow-up copy of the response after your response has been transmitted by facsimile will only cause further unnecessary delays in the processing of your application; duplicate responses where fees are charged to a deposit account may result in those fees being charged twice.

Any inquiry concerning this communication or earlier communication from the examiner should be directed to Examiner Ho whose telephone number is (703) 305-0738. The examiner can normally be reached on Monday-Friday from 7:30 A.M. to 5:00 P.M. Eastern Standard Time. If attempts to reach the examiner by phone are unsuccessful, the examiner's supervisor, Mr. Charles Marmor, can be reached at (703) 308-0830. Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (703) 308-2168.
